Does anyone have a need for a Tascam DA 30 MKII for parts? Unit has a bad transport mechanism. Everything else, case, knobs, electronics are perfect. Tascam still has the new transport/loading/head assembly, but it's \$330. I just hate to throw it in the dumpster, if someone needs parts, or has a beat up unit with a good transport. Transport is all modular. Remove 4 screws, unplug & swap out. 10 minute operation. I figure it would be \$20 bucks or so to ship out. Mark St. Pete Florida

Hello, is the deck still available? If so could email me the information/ costs /carrier to send the deck to Toronto Canada.
