I have a Graaf GM-20 OTL amplifier for sale. This is the newer model with the WBT binding posts and the copper bars on the tube sockets to disipate the heat. Condition is beautiful except for one small chip (1/8") in the paint on the top of the power transformer. I bought it this way. Other than that, it is excellent, as is the tube cage. Will ship in original padded box with the cloth Graff covering for the amp. Asking \$2200 + shipping. Email me for any questions at 2a3@swbell.net.Mark
