Old Zenith radio in a rebuilt cabinet. My research indicates it is probably circa 1935-1938. Not original cabinet. I am not a radio enthusiast sp. I just bought it at an auction. I plugged it in and it receives ok. I couldn't adjust the stations. Probably because I'm ignorant of the radio. It has a round face and four knobs. They seem to be in good shape. I thought maybe someone here could use it for parts or project. e-mail me and I'll send my ph # thanks. -Ed Kirchner
