Merrill DCA 5.5 based monitors made by Fritz of Fritzspeakers. The cabinets from Fritz are beautiful myrtlewood veneer and have large flared rear ports. The binding posts and internal wiring are top notch, the condition is like new (about 100 hrs on them) and they sound great. These largish bookshelves (18 x 13 x 8) do most things right, and have a great tonality with no mid-range "shout" that plagues many single-ended designs. To boot, they go well into the lower 40 hz range, are 90 db efficient, and can rock with with lower power amps. Reason for selling is to go with a completely different omni-directional beast due to serious room constraints. First \$500 gets em. I am in NY and would prefer a local transaction.
