I have a pair of these cabinets which look like the 1958 PM magazine version loaded with Electro-voice LT-12 drivers. The LT-12's are 12" with whizzer cones and the cheaper T-35 type horn with internal crossover. I measured the LT-12's installed in the Karlson cabinet and they play nicely down to approx 60hz (fs of LT-12) which is okay if you use a sub. Efficiency is approx 94db/watt by my guesstimation. Local pickup in Columbus, Ohio as they would be difficult to ship. Asking price \$450.00 or possible trade for tube amps/JBL or Altec drivers/wood horns. Regards, Ron
