I am preparing to build the Pi 4 pro series speakers and I would like to have a few replacement diaphragms on hand in case I blow one, where can I buy them for the JBL 2426H ?

You can get them from Speakerworks at (918) 664-6299. Ask for David Miller.

I doubt I'll need them... but then again... I push my speakers pretty hard.

The 2426 on the horn will produce 100dB with 1/10th watt input, measured 1 meter away. It produces 130dB at maximum output. So if you blow one of these while listening in your home, you probably should have your hearing checked. Seriously.
