hi wayne, i've forwarded the plans for the premium stage 4 pi's to my cabinetmaker. which measurements do i use? on the website they are 26" x 18" x 14" but in your plans they are 26.5" x 18.5" x 14.25". also confirm that the port size is correct as well. thanks george.

All the dimensions and instructons in the plans are right, so have the cabinetmaker follow them closely and contact me with any questions. The dimensions on the website are rounded to the nearest inch.
