Hi Wayne,At my snail's pace, I'm finally getting down to the last few construction steps on my 2Pi's.As long as I'm following all of your other recommendations, I felt I should ask: What kind of wire/cable do you prefer for internal speaker wiring?Thanks.-uW

I use 16 guage zip cord. On these little speakers, you could also use 18 guage wire. Use a good quality, pure copper stranded speaker wire zip cord for hookup inside the box. For that matter, that's what I use outside the box too, for amp to speaker connection. Nothing fancy, does everything we want it to do and works just fine.

Thanks, Wayne. Clearly, I've been hanging around too many tweakers who are superstitious about wire. Always happy to have your no-nonsense advice as a counterweight.-uW
