Only \$369 ea and free shipping! As soon as I am finished with my Four Pis (five of them) I plan on building a very high output subwoofer and these 2241H drivers are at the top of my list of drivers to choose from. I called this company up asking them to stock more JBL raw drivers because based on this price they would have the lowest JBL prices on the net. They told me they only carry this one driver and will not be adding any more to their inventory, oh well still a good price on this driver if you happen to need it.
