Hi I noticed that the 2235 was not used in any Pi designs, was there a reason? For a mid bass driver in a home environment how does the following driver compare: 2202 Vs 2204 Vs. 2206? Thanks Spencer

The 2235 is tuned for deep bass, not so much for use up through the midrange. The 2202, 2204 and 2206 are tuned for use in a higher frequency range. All but the 2206 are out of production. I really liked the 2235, by the way. I also like the 2205 and 2225 drivers, and the 2245.
