hi wayne, just got off the phone with my cabinetmaker, it's been 2 months since he started!!! anyways the cabinets are ready, only the port enclosure needs to be made and he lost the measurements! wayne would you be kind enough to post the port dimensions here on the forum again - i deleted all my saved e-mails. the speakers are premium stage four pi's with the kilomax woofer. i can't wait to finally here these babies and if he doesn't complete them right away, i'll finish them myself.thanks george

Subject: Bummer!

Bummer! Sorry for your delay. The port is 3.5" x 6" and 10" long. These are inside dimensions.

Subject: thanks wayne
