good morning wayne, i'd like to build new x-overs for my 4 pi's using premium components. i'd also like to build it entirely hand wired without circuit boards. can you send me a wiring diagram and schematic?

The schematic comes with the plans, so you can build from that. I'm sorry but I don't have a step-by-step wiring diagram, just the schematic. In a couple weeks, I'll have some free time so I could build them for you if you want. Just send the parts or let me know what you want and I'll get them for you. Let me know.

---

Subject: thanks wayne, i'll wait
