Hi all,I am progressing slowly to my Pi-aligned afterburnerand currently I am searching for some suitable tweeterbecause i haven't access to RatShack tweeter. Thorsten suggested Beyma bullet tweeter CP16.I have also possibility to purchase another Beyma's tweetersand also Eminence tweeters - do you have an opinion on the APT-80?Or better: could someone compare CP16 and APT-80 ?Thanks,O'Tor

Hi Frode,Thanks for your input. Is the FT17H the same tweeter as used by BC Acustic (spkr's like Niger, Nill,...highly regarded HiFi speakers) ?I think it's French company, not shure if present in US.Anyway, their HF sound is excellent ! O'Tor

Hi!! don't know if this tweeter is used in the speakers you mention. When I tried to order the FT17H from Studio M in Italy, they said that it was out of stock. They would get a new shipment in the end of the month. They also recommended the Technics 5HH10 tweeter at 63 Euros each(FT17H 53 Euros). I haven't decide which one to get yet.RegardsFrode

Hi Frode, I don't know Technics, but Thorsten suggested to use Fostex FT17H OR Beyma CP16 for Afterburner. Beyma is a little bit cheaper (in CZ 1 pc = 1,300 CZK = 39 EUR). O'Tor

Ops, sorry for inconsistency, I'm not insisting on use of Beyma at all, I just forgot to read the beginning of this thread :-). O'Tor
