I know its not really "pi" related this time. I do plan to do a pi-align speaker with Beta12 to match the my pialigned speakers with Gamma 12's, in the near future, once my finger heals.enjoy !

some new pics..

Just get a PC emulator for your Mac. PiAlign is old code, written before the PC or the Mac even existed. The binary distribution was compiled on an early PC and uses straight 8088 code for MS-DOS.
