George, Did Wayne use an Eminence PXBii1K6 crossover and just add compensation, or did he build you a complete crossover from scratch? Colin

I use a PXBii1K6 and add a tweeter cable assembly with R1, R2 and C1 compensation components added to it. I also add a Zobel. The tweeter compensation has (4) 10 watt series/parallel resistors for R1 and another (4) for R2. The Zobel has a single 100 watt resistor and a cap.

Subject: COOL.... THANKS WAYNE! (NM)
