for those who don't already know. !!! WATCH OUT for emails with a _ in front of the senders address. DO NOT open the attachment on these emails, THEY ARE NOT FROM WHO IT SAYS !!! They seem to be mainly aimed at regulars on the Mad board, at the moment. but be WARY !!

Thanks for the "heads up." I've noticed for the last two days, I get about 20 E-Mails a day that appear to be addressed from someone in my "Address Book," but there is no message body - only an attachment. That's a tell-tale symptom of a virus, so I never open them. I haven't paid close attention to these E-Mail's because they are immediately disposed but it may be that they have an "underscore" like you've described. By the way, what's the "Mad board?"

I believe Symantec have an antidote for it at <http://www.symantec.com/avcenter/>
or <http://www.antivirus.com/vinfo/>
