Let me see now, two 2226J's in a box for 220.21 (i.e. 4648A-8 on blow out sale), or single 2226J-B's stocks at 340 each on the b stock sale? Hope my wife doesn't kill me...two 4648A-8 cabinets are ON THE WAY...yeeehawww. Wayne, now my 511's will have some nice stands, eh. Dual, dual 2226's should hold up the bottom end well enough. Pinch me, I'm dreaming. Sam

Subject: why would you want just one woof?

Posted by [Sam P.](#) on Mon, 17 Dec 2001 21:03:04 GMT

When you can have 2 per side, 1 pair of 16 ohms works out to a nice 7 ohm z min. Those 2245's are not completely gone, they are on ebay at about 450 to 500 per pair, NIB still. Pick up that phone, or mouse, whatever...but if you hesitate, don't whine later, it's not dignified...Samand if one 4648A-8 system per side is not enough, I'll hook up the SECOND PAIR also...yes folks, he is truly out of control now...4 2226J's per channel...the nice lady from JBL actually called to make sure...you really meant to order 4 systems total? She said that putting them all in one room sounded like a swell idea...to be continued...
