I haven't heard anything to the contrary so I'm expecting a JBL 4648 with 2- 2226 8 ohm woofs. \$221 delivered instead of \$325 each plus freight. YEEHAW!! I'm thinking corner 7's with Eminence tweeter and 3 channels of 200 watts for the old home theatre. Or maybe I keep the satellites for the fronts and build a great big center channel/subwoofer/TV stand. I can't even figure out crossover schematics and I'm scoring drivers in the street. Just shoot me, somebody.

Subject: are you sure you ordered a 4648?

Till, The ones I ordered are the 4648A-8, using a pair of 16 ohm 2226J's. The 4638 enclosure has the pair of 8 ohm 2035's. Check your form confirmation to see what is on it, to be sure. Sam

Subject: Re: are you sure you ordered a 4648? Yup.4648A-8 (nt)

nt

Subject: there are three versions of the basic 4648,

[View Forum Message](#) <> [Reply to Message](#)

one is the 4648, using a pair of 2226H (8 ohm) woofs, with a system z of 4 ohms. Another, the one on the tent sale for \$220, is the 4648A-8 using a pair of 2226J (16 ohm) woofs for a system z of 8 ohms (hence the -8 at the end of the model number?). Another version has the first woofs, with a network also. It appears to me that you have a pair of 16 ohm 2226J's coming...maybe Wayne can suggest proper xover values if you need them later. Sam

Subject: Thanks for the heads up Sam

I should have seen that the 8 would be 8 ohms with the 2 drivers combined. But if I don't wind up using them in place of the Delta's I will use them together, with another PSD-2002 horn for a kick-ass center channel for my HT setup.BTW, have you figured out how the "net weight" can be 137 lbs and the "shipping weight" is 104 lbs.? Is this a trick question?I also wonder if the \$220 covers all the truck freight from Northridge to Ohio!

Subject: Thats the empty cabinet. I did the same thing.
