Hi Wayne,Is 14 watts adequate to produce accurate and substantial bass at realistic sound levels with this speaker? Are plans available?I've run the gamut of SE amps, PP amps and have settled on a tube signature that I like (EL84). I'm going broke losing money on equipment swaps, and would love to build a pair of these. I'm coming from Lowthers, and while I love some of their sound characteristics, I just can't take the lack of bass. I love the speed of horns, and wish I would have found this site 3 years ago.Best regards,Pat Landru

You bet, but first please send your E-Mail address. If you want, just E-Mail me a letter and I'll reply to it with plans.
