Here's one for our resident Squeezebox guru, Skip Pack: How can I tune in ART Radio on my Squeezebox?

Wow, sounds great! Thanks! For some reason my "reception" is intermittent, but I think that's because I'm out in the boonies and have a flakey connection.Now I must muster the willpower to go out in the workshop and finish up some prototype boxes. Must... finish... boxes...Okay, after this song is over ("Radioactivity" by Kraftverk).Duke

Glad you like it, I am learning how to arrange songs on playlists. I played switchtech after radioactivity (which was the very first song at noon on Sunday) so I am not really sure of order. I was hoping you might get to catch it!! I think its a GREAT song. Finish those boxes lol.....

It' dead simple. When you go to the main window of any of the ARTtopical forums, there's an "ART Radio" link between "Home" and "Posting Rules". Clicking on that brings up a small window, and,at least on Windows, opens the download manager. It tells you about a file named "play.pls", which you want to download to your disk. It's a one line text file and the .pls suffix means that it's a playlist. You could open it with Itunes or Windows Media Player, for example, and then ART Radio would stream though your computer's sound card.For the Squeezebox, move the file to the directory where you keep your files for the Slimserver database access and purt it at the top levelso it will index at your first browsing level. I renamed "play.pls" toART_Radio.pls so I could easily spot it. Then you bring it up on yourSqueezebox display and hit play. It'll take a few seconds to buffer, and then it plays. Worked flawlessly for me for over an hour or so yesterday.

Subject: Switchtech

Thanks Melissa - I was wondering if Switchtech had been played. Glad you like it! My son has

been listening to ART Radio and thinks it's a great mix of songs. So do I, judging by what I've been able to hear so far; Switchtech is mingling with some rather exalted company.In case anyone is wondering I'm talking about, the song "Switchtech Circuitry" is by one of my sons, performing under the name "Klez". Needless to say I'm grinning from ear to ear that Switchtech made it on to the playlist.Duke

When I click on ART Radio the small window opens with this at the top: http://www.audioroundtable.com/ARTradio/index.html?poc=2I don't see a play.pls file.

Fred,When I open the small window, a secondary download manager windowcomes up and that mentions play.pls. You might be able to get the download window by clicking on the white arrow in the lower left hand corner of the initial small window. If that doesn't work, I can email you the renamed file "ART_Radio.pls" that I have in my music directory.Skip
