Hi Wayne. I E-Mailed you last week. Thank you for your response. After looking at your lineup, I think I am interested in the Theatre Four Pi. Can the JBL 2426 be used with the Eminence 15" Delta Pro? Would the balance be OK? Second Subject. I have a JBL D130 & 075 Ring Radiator. They sit in a falling apart very old HeathKit enclosure. My Paramour easily drives them very nicely to a good (for me) level. Does your Professional Series relate at all efficiency (or soundwise) to my old mono setup? I have loved my D130 over the years. I have had it since 1957. Anyway, I would consider the Pro Series if my Paramours could handle it. I know my old McIntosh 250 amp will. I would appreciate your comments. Matt Reddington in DaytonI would appreciate the plans for the Four Pi Theatre speaker.

The JBL 2426 compression driver can be used in place of the Eminence PSD2002 in the Theater tweeter. I'd much rather have a speaker with a JBL 2226 and an Eminence PSD2002 than one which uses an Eminence PSD2002 or JBL 2426 compression tweeter. Let me know if you'd like
