Subject: So what to do with 4648 Cabinet and M-115's?

The horns from the 3677's are going into the 7 Pi's which leaves me with the 8.5 cu. ft. snack table and the pair of lightweight 15" woofers. Build a pair of subs?Team them with Motorola piezos for HT surrounds or a center channel?Put them back into the 3677's and find a tweeter to go where the 2618's were?All suggestions appreciated.

I have the same problem. I think I am just going to Ebay the drivers and all 3 enclosures. I have an extra pair of compression driver 2416'S that I could use to put in the 3677 cabinets. They would make great rears but I don't have room for them. You could put the M115 in the big bass cabinet just to see how they sound. If you run the T/S they look OK but you need a big box for them. Don't think they would work well as subs for your 7Pi's. Well let us know I would sure like to know what you come uo with.

Subject: I'll take the 2416's

The only thing keeping me from having the 3677's as surrounds. If you can part with them name a price.

Subject: Thanks but I am a pack rat I hold on to them for now. nt.
