Anybody know anything about this driver? Here's the Tent sale line "M252-8B2 S/M, M222-8B2-2 PER CARTON; 12", 300W Woofer 171 50.00 "does that mean its "similar" to the M222? MSRP for the M222 is \$300" JBL-M222-8 12" JBL 350 Watt 8 Ohm Sub Speaker \$300.00 "

The only thing I don't know is whether what they are selling is the 252 or the 222. Either way, \$50 is a deal. I'm guessing that \$50 is for one right? not a carton of 2? Quoting from Freddy Danny -252 should be 15", and 222 12" by specs; M222: fs=71; qts=0.48; qms=3.6; qes=0.55; vas=41.9l; Pe=300w; xmax=6.35mm; Re=4.2; Le=0.43mH; Sd=0.053 M252: fs=51; qts=0.56; qms=4.6; qes=0.64; vas=137.1; Pe=300w; xmax=6.35mm; re=4.2; Le=0.43mH; Sd=0.088 sound like sealed box woofers - might be real nice - certainly good price if you have an application Freddy

I think (but not positive) these are musical instruments speakers. I'd swear I'd seen one of those scanned brochures for some cabinet or another that used them. I really wish JBL would include literature for everything they're selling. As for the quantity, I'm betting its two for \$50. Just call them.

I didn't call. I paid \$100I figure.Worst case: 2 M222s for my \$100. which is still a deal.Best Case: 4 - M252s for my \$100. which would be a cool suprise.Most likely I'll get 2 M252's cause thats the part number I ordered. I'm sure the "S/M M222" means 'similar to M222'anyway, I'll let ya know. How long should I expect them to take?
