I just received my Eminance PSD 2002 drivers and the 290 horns from PartsExpress for my Theater Pi 4's. They didn't come with bolts. Does someone know what size and lenght I need to get ? Thanks in advance...Tom

You can take a look at the photo below what i've done to fit the bolt:The local fastener shop had a hard time identifying the alen key bolt to fit in. On the invoice the description of the bolt is "Socket

Cap Screw - 6 x 16". So i assume 6mm head x 16mm long for the inside 3 bolts. \$1.35NZ each so (60 cents US each).
