Jef and Deborah Larson of abraxasaudio brought their Loftin-White 1626 "Darling" amp.abraxasaudio 1626 "Darling" amplifierSounded great with Brines speakers, shown above. They also brought a 2A3 SET amplifier, as can be seen in the Dagogo review. Many people commented this was a winning combination with tower two Pi speakers.

Jim Harrell of Jumping Cactus Loudspeakers brought his high efficiency isolated aluminum loudspeakers.Jumping Cactus LoudspeakersThe speaker cabinets are made of aluminum and use Eminence drivers throughout. The woofer is 10", midrange is 6.5" and tweeter is 1". I really like the way they look and the sound was good too!

Subject: Re: LSAF show coverage - MaxxHorn

Neli Davis represented Audio Note. I liked her a lot because she is super sweet!Audio Note systemThis was an all Audio Note system consisting of an integrated 10 watt EL84 amp, AN/E speakers, a TT2 turntable, an OTO phono stage, CDT-3 CD transport and DAC 4.1x. They even brought out their silver interconnects!

View Forum Message <> Reply to Message

Brian Smith and David Cope represented Audio Note kits. They brought several kits and parts, including a brand new, yet to be announced mono-block chassis.Audio Note Kits monoblock chassis and DAC kitThe mono-block chassis (shown above) is designed to be modular. The one we listened to is essentially one channel of a Kit 1, which is a SET amp that can be configured to use 2A3 or 300B outputs. A parallel output module can be installed in the chassis to allow for a pair of output tubes to be operated in parallel. Neat stuff!Gobs-O-Goodies in the Audio Note Kits room

Bob Brines brought three pairs of his speakers to LSAF 2007.Brines Acoustics FT-1600, LT-2000 and FB-16 loudspeakersBob Brines specializes in single driver speakers. He brought several, and augmented them with a subwoofer, shown above in the center. Sometimes, he used Fostex supertweeters on top too. Bob used an audioabraxas amplifier to power his speakers. Sounds great, Bob!

Custom Isolation Products makes the coolest looking tables and racks you've ever seen! I love the cool blue glow. I'm not sure what it does for the sound, but it sure looks great! I'm told it makes a very stable support for audio gear that reduces vibration and noise. Very sleek!Custom Isolation Products

View Forum Message <> Reply to Message

Brad Baker represented Hawthorne Audio. They make what are called open baffle speakers, which are basically drivers mounted on a single panel, without a box. Some say this makes a more natural sound.Hawthorne Audio speakers driven by Scott electronics
