Hi Wayne, I am going to make a pair of 2Pi's for my tube amps to go in a different room. If you could please send box dimensions and port dimension that would be great. Would a Beta, or any other driver for that matter, be a better choice than the Alpha? I have some Motorola KSN 1016. The specs look similar to KSN 1038. 1038 is the one, or no difference? Is the SPL of 97 for this speaker, a plus 3dB of the two 94 driver? +3 for two of the same? Thanks! Bill

I prefer the Alpha 10 to the Beta 10 for a two-way speaker like this. The KSN-1016 is a nice little horn. It has a different dispersion pattern, that's all.
