Pictures from our May 19th meeting are posted at the link below. It was a small meeting compared to some past ones, with about a dozen bottleheads there. We heard Paul O'Neal's great new "Facet" speakers, and we did an A/B comparison of the Lite Audio DAC-60 and the Citypulse DAC. Also heard some great vinly on Luther's main system with Gene's Tercel phono pre from Juicymusic.com - it's amazing how good a true high end analog system can sound!

Very cool, Fred. Is that Sound Creative amp still being sold on eBay? If so, what's the price now?

Sorry, they're long gone. I got mine for \$299. The last few sold for \$399. Not too shabby for a SET amp with a big oil cap in the ps, a choke, Multicap film coupling caps, and a stainless steel chassis. The \$299 also included a pair of interconnects and a pair of speaker cables.

The gallery was great wasn't it? I had to save it on my computer. I don't know how that works because I haven't been back to see it but I'm sure they saved ok.
