Hello. What is included in your one Pi studio speaker kit? I am interested in building a pair. are there any plans for this online? It would be helpful to see the plans etc., before I decide which one to build (I am also considering the Two Pi - haven't decided yet). Would it be possible to see the plans for the One pi?My email addy is included above.Thanks

copy of the plans. For larger speakers that incorporate a compression tweeter and crossover network, kits also include the crossover, tweeter compensation cable assembly, Zobel woofer damper, and all cable assemblies are completed and ready to install. Every kit containing a compression driver also includes the horn flare and the bolts to mount the driver to the horn.
