Has anyone tried pairing a CTS piezo driver (maybe the KSN1142) with one of the Eminence Beta coaxial woofers? I'm thinking the Bets 10cx, at 97dB/1W/1m would be a great matchup.Thanks.

Sounds like that combination would make a good speaker. If you try it, let us know how it turns out.

Subject: Similar to two pi?

Sounds like I might just as well build your two pi. Can you send me plans? What does the kit include? Thanks.

Okay, I just had to read the bottom of the page to find out what's in the kits. I'd still like the two pi plans, however. Thanks.
