Hi Wayne & the Guys, While exploring the kit section, I've noticed that Pro series have some with JBL2226 woofers and others with JBL2227 woofers. Why the difference? Also, can partial kits be purchased, for those of us who have some of the parts sitting on our work benches gathering dust? Maybe I should quit riding my m/c and build more speakers instead. Yeah, but it's Summer and the weather has been great. Take care, Steve

The 2226 and 2227 are similar, with the 2227 having more midrange output and rising response.
