Hi, Is there a table or list somewhere that shows the standard dimensions of Pi speaker? I am considering building some sometime in the future and I would just like to have an idea of what size the speakers are. Thanks Andy

There is a price list at [www.PiSpeakers.com/Prices.htm](http://www.PiSpeakers.com/Prices.htm) that shows cabinet dimensions and some other general specifications for each speaker. You can click on any model and it will take you to the appropriate section on the "Available Components" page, at [www.PiSpeakers.com/AvailableComponents.htm](http://www.PiSpeakers.com/AvailableComponents.htm). On this page, you can click on each driver, and it will show you information about each individual part.
