wow, check out how massive the selenium driver is. i'm planning on using this with the selenium wpu1505 woofer and the hm39-35r horn in a selenium version of wayne's 4 pi pro. i'm very impressed with the build quality of their product and especially like the look of the horn. wayne, i'll send you the spec's so you can tell me if it works.cheers,george

Specs show the same box tuning is appropriate, and as I recall, Brian was more than pleased with their sound.
