Is there another horn lens other than the JBL 2382, which I just found out costs $250 ea., that will work with the JBL 2446H. Seems like a huge amount of money for a lens

P-Audio makes inexpensive copies of the most common JBL horns. I gotmy 2370A clones locally for 70$ each. Nice horn for a fraction of thecost. only a pro could tell the difference, and it isn't cheaply madeat all. Check Speaker City if you don't have then available locally.Thomas
