Is there another horn lens other than the JBL 2382, which I just found out costs \$250 ea., that will work with the JBL 2446H. Seems like a huge amount of money for a lens

P-Audio makes inexpensive copies of the most common JBL horns. I got my 2370A clones locally for 70\$ each. Nice horn for a fraction of the cost. Only a pro could tell the difference, and it isn't cheaply made at all. Check Speaker City if you don't have them available locally. Thomas
