I just wanted to thank you Wayne for listening to all of our ideas. I ordered a couple'a Tower Two Pi kits on your "on-line" shopping thing. I am VERY excited to finally try out these Pi Loudspeakers. I'm also thinking about building some regular Two Pi boxes at the same time, since all the components are the same, and compare the "sonic" differences. I'm sure it will be easy to swap out the drivers.If I could get silver decals this time that would be great... :)Regards,David
