Looks like a neat amp. How do you think it compares with Audio Note Kit (1 & 2) amps, which are about the same price? I realize you don't own an Audio Note amp, but you've heard them. If you were going to be in town on the 8th, I would have suggested you bring this amp. I could bring my Audio Note Kit 2 and we could all listen to them both side by side.

Hi Wayne,Hard to tell how they would compare, since one would need to hear the 2 in the same sound chain (source, cable,speakers, program material) and with little time lag in order to meaningfully compare. It would be great to compare the 2 at the meet , except i will be out of town, and secondly, the manufacturer will probably have had the review sample picked up from me by then. I will have the Moore 2a3 though, for our next audio meet since I own that one. That would be fun to compare to the audio note gear. Have fun at the audio meet, and we should all meet again real soon. -akhilesh
