Hi WayneThe pictures for the plans of the 2pi towers were too big for my Computer to open, could you perhaps send a smaller version?ThanksOscar

The plans are sent as relatively high resolution image files, but rather than my re-sending, I suggest you simply open them with a paint program and view and print them from there. You can also rescale them if you wish, but that will make them lose clarity. The files will be smaller though, so you'll save a little disk space.Anyway, grab a copy of "Paint Shop Pro" from JASC Software and give that a go.
