I've got my "new" Theater 4 crossover components hanging off the original Eminence boards inside the exterior boxes mounted on the back of the main cabs. Now I definitely will get everything rebuilt on new boards and clean up the mess!Nice job!G.

Nice job, TomDo you notice a difference in the mids without the grill cover? I'll bet the Delta feels safe behind it.John

Thanks John! I was real worried about the grilles, but my friend now has a baby girl so I need to get used to them. (plus I might want a pet some day) I cannot tell any difference at all, which surprises me actually, I was expecting to notice. One thing though, if you are playing SUPER LOUD you can feel them ring a little, but the whole house is rattling at 120 dB so it isn't an issue. (yes I wore plugs to get that close)Thomas
