I hope you guys remembered to watch the Leonid's tonight! It's an amazing show - Best in our lifetimes! I remember about ten years ago, there was an evening of extremely heavy activity. It seemed like I saw one every couple of minutes, and sometimes one right after another. So check it out!

I was surprised by the color. Wish I could have watched more, but I was at work. In fact I would have forgotten if not for your post, so thanks. Hope you have a great day, Thomas

I didn't go out because of the full moon. It turned out that it was hazy all night here anyway in NE PA. NASA scheduled another one for next month...
