WayneSorry to be a pest but I managed to delete the wiring plan for the 2pi speaker that you were kind enough to send me. Could you please reforward it? I still have the rest of the plan. Just one more question, does the 2pi tower have any of the one note bass boom that one tends to associate with bass reflex designs? I hope not as I ordered my speakers yesterday. Regards Colin

Only poorly formed systems have "one note bass" whether bass-reflex or any other kind. You'll find that there is no difficulty getting flat response from a bass-reflex system having a good woofer expensive models.

Wayne, can you tell us the (theoretical) -3dB points for the two 2Pi models? Thx in advance.
