This is a Windows media player? How about a screen cap (alt-print screen)?

I'm using Winamp in it's new version. I found it friendlierto use than the old Winamp and it is quite feature rich. For those who experiment with a lot of players, there'salso Foobar 2000. Foobar is more frequently updated andcan play more file formats. It also has a user forum forquestions about plugins. Foobar 2000 forum is available at Hydrogen audio.com
