It is possible, just connect it as you would any other speaker. As for performance, I'm not sure what you'll get. I'm not terribly familiar with Sony car stereo stuff, except that I have one of their little CD players in my Porsche. It sounds pretty good, but to tell the truth, I hate the animated light show they put on the front panel.

Don't waste your time and money, xplodes are absolutely horrible excuses for subwoofers...Adam
