My image viewer is struggling with opening the baffle cutout print. Could someone let me know where the woofer is to be located from the top of the speaker. I remember an 11" measurement but don't know if this is a center to center driver spacing or spacing from top of cabinet to center of woofer. Thanks, Jerrod

I emailed you a reduced picture so you can open it. You are correct that from the bottom of the cabinet to the center of the driver is 11"Bill
