"Getting the most from your table saw, planer and jointer." 11:00 at Home Depot 3846. Wax those speakers. Forget that lemon/orange/cranberry/crap! Johnson's, baby. Put a big blob of wax in the middle of a 6" square of 'Handi-Wipe', fold the corners in to make what the French call a "tampon" (I've learned to say that in front of groups of woodworkers with a straight face), put the tampon inside a bigger handi-wipe and let the wax flow out of the bag thingy you made as it passes over the wood. Then you don't have to keep going back to the tin for more wax. And puts it on evenly. Don't let it, or any wax, dry completely. As soon as it begins to haze, wipe it off/rub in with clean cloth. Unless you need an anaerobic upper body workout in which case use Carnauba wax and let it dry before you wipe.
