Thanks, I'll look at those links when I have a chance. There has been a great deal of interest in this subject, so I'm sure that many others appreciate this information as well.Have you downloaded and installed the Spice models

Wayne,I would categorize myself as a builder rather than a designer. So no Spice for me!Being a "Spice Guy", I hope that you will find John Broskie's TubeCad website very informative, since he is a Spice Guy too.BrianP.S. I really enjoy the friendly environment that you have fostered on the PiSpeakers forum. Now that Listener magazine is gone, the Pi forum is first place I go to get my DIY fix.
