Hi Folks, Does anyone have an opinion on the MPA series amps that JBL hasin the Tent Sale? There's a few available in the $240-$300range. Specs seem reasonable. I can't tell for sure, butI think these are 220Vac models. Thoughts?

Sorry, I don't have any experience with JBL amplifiers. I've always used Crown for high-power applications.

..it is made for permanent install and thus does not have XLR on the back.....other than that it does what I expect an amp to do....turn on and power my speakers.....
