Hi I am new to this forum. I have just built a Hi Fi World 2A3PSE tube kit (from the UK; I am British, but live in the states) and I now want to build a suitable high efficiency, smallish (live in an apartment!) and easy to build kit. \$400 or so. Is this do-able? Thanks Steve Vaughan

If you need to build a pair of speakers in the \$400.00 range, I suggest limiting your choices to the

just fine. Look around on this forum a little bit and you'll see a lot of discussions and feedback about each of these speakers. Any of them should work well for you.

Hi Wayne Sadly, only \$400 a pair to start with. Any chance of looking at some plans. I am good at soldering, but distinctly average at woodwork..... Thanks Steve
