Wow! Are the speakers solid wood or veneered? They are absolutely gorgeous. (My first Pi 2 Towers are in the works.)Shame I live on the East Coast. I'd love to come out to MAF and see them in person.Jeff

Hi Jeff,They are veneer. it's not impossible yet, but very difficult and expensive to get high figure solid wood. I'm on the east and it's not too bad a drive. try and make it if you can. good luck with your speakers. Its' a lot of fun making things that have function and sound great too.Bill

These are fantastic sounding speakers. Wayne has done a good job picking out the right components and sizing the enclosure design. The filter is a major part of it too and it all works well together.Bill
