Does anybody have an opinion about the suitability of the Alesis RA-300 for use with the 10Pi in a bi-amp situation (one RA-300 per speaker)? Maybe a similarly priced alternative (about \$300 each)?Thanks

Hi Charlie!

Sorry, but I'm not familiar with this amp at all and so can't comment. But about the crossover, you'll want to make sure it can be configured for CD EQ. You might want to look over the post called "6DJ8 Tube Crossover."
