Hey everyone. Cant seem to find this info anywhere, even though its probably staring me in the face lol. I was about to order a pair of JBL 2370 horns, then I just remembered, I have no idea wheather it uses screw or bolt type mounting!!! The compression driver I want to use with it is bolt type, probably 2 or 3-bolt. So if anyone can tell me what the 2370 uses that would be great! Thanks! Adrian

Subject: Standard 3-hole bolt-on mount

The JBL 2370 uses the standard 3-hole bolt-on mount as its only connection method.

Hey, thanks for the info. I just hope the 2370 is the 2370A! Im not actually sure if the one I'm ordering is the A version or not, if it isn't though, would it be safe to bet that theres little difference between the two? Thanks! Adrian

Subject: they are the same wayne!

Hey Wayne, just thought you might be interested to know I contacted JBL Professional and they have told me the 2370 is the 2370A! So I'm happy :) Cant believe I picked up a pair of these horns for around US$30 a piece..... ! And theres still 4 left, maybe I'll snatch them all up!

where it was claimed the older 2370 was made of thicker fiberglass than the present 2370A's. Other than that, as long as they are undamaged, you are getting a great price. Are you CERTAIN that the Paudio drivers will work for you as well as the psd-2002's Wayne normally specifies? Sam

Hey Sam. The response I got from JBL was not to worry at all, as they are "one in the same" so I'll just take I shouldn't worry about any differences :) Have not heard of the psd-2002's before, but all the feedback I've gotten for the P.Audio stuff has been good so far. The other reason I've choosen P.Audio is that in Australia I can get them at great prices. Unless you have suggestions for other ones.....?Adrian
